

Our Extensive Product Range

GAM has access to a wide variety of complementary motion control and power transmission products which expands our product range even further and makes your machine design experience easier and more efficient.

VS - Spiral Bevel Speed Increaser

- Available in 6 frame sizes from 90 mm up to 260 mm
- Ratios 1.5:1 to 2:1
- Multiple shaft configurations offered

SLC - Servo Worm Gearbox

- Available in 5 frame sizes
- Input adapter suitable for servo motors
- Ratios 5:1 to 26:1
- Also available with shaft input (S-Series) which has 9 frame sizes and ratios 5:1 to 83:1

VL - Spiral Bevel with IEC Flange Input

- Available in 8 frame sizes from 65 mm up to 260 mm
- Input adapter suitable for IEC motor
- Keyed hollow input shaft
- Multiple shaft configurations offered

V - Multi-shaft

- The modular design of the V-Series makes it possible to produce a wide range of variations
- Multi-plane shaft configurations
- Ratios 1.5:1 to 6:1

KS - Helical Bevel Gearbox

- Compact design available in 8 frame sizes
- Shaft input or adapter suitable for servo motors
- Ratios 15:1 to 75:1
- Nominal torques up to 7500 Nm

A large, empty rectangular box with a thin blue border, intended for taking notes.

Broadest automation product range on the market

GAM is your complete source for innovative products used in automation technology.

Robotic Gearboxes

Zero-backlash gearboxes for robotics and high-precision applications with revolutionary zero-backlash planetary, cycloidal, or strain-wave (harmonic) gearing

Servo Gearboxes

In-line and right angle gearboxes for precision servo applications in a wide variety of configurations and frame sizes. Off-the-shelf or custom, GAM has the gearbox for your application

Bevel Gearboxes

Precision spiral bevel gearboxes, from miniature to extremely large, with multiple shaft configuration options for servo or precision power transmission applications

Servo Couplings

Bellows, elastomer, safety, or distance (line shaft) couplings are all zero-backlash and custom bored

Rack & Pinion Systems

Helical rack and pinion pair with GAM gearboxes for optimal system performance in a complete linear system. GAM rack available separately

Linear Mounts

Everything Between the Motor and the Actuator: GAM linear mounts make it easy to connect any motor to any actuator.

GAM, a U.S. company, is your complete source for robotic and servo gear reducers, rack and pinion systems, servo couplings, linear mounting kits, and other precision mechanical drive solutions used in automation technology.

With one of the largest product offerings in the motion control industry as well as the engineering expertise and manufacturing capabilities to develop customized solutions, GAM can help with your application.

U.S. manufacturing, being flexible to meet the needs of customer requests, and great service are what set us apart from the rest.

GAM Can.
